REASONS FOR ALLOWANCE

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-6, wherein the an image pickup apparatus comprises a casing, a lens barrel provided on the casing and movable, an annular adaptor ring attachment portion provided on the casing surrounding the lens barrel, detection means for detecting that an adapter ring is attached to an adapter ring attachment portion, and lens barrel control means for controlling the projection amount of the lens barrel in response to the result of the detection of the detection means, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references are cited for disclosing an optical device comprising a lens barrel and having image detection capability: Iwamoto et al. (5521036), Chino (6046863), Shioda et al.
